

# General Subject Index

Volume 180: May, June, July 2015

A

Absolute angle, 341  
Advanced Boiling Water Reactor, 335  
Advanced Heavy Water Reactor, 172  
Aluminum-water explosions, 312  
Anisotropic scattering, 224  
Anisotropy, 182

B

Batch means, 58  
Burnup calculations, 286

C

Constrained sensitivities, 345  
Coupling schemes, 286  
Covariance, 345  
Critical heat flux, 141  
Criticality, 199  
Cross-section data, 341

D

Dancoff factor, 30, 41  
Disadvantage factor, 30, 41  
Discrete ordinates, 273  
Doppler broadening, 209  
  rejection correction, 209  
Doubly heterogeneous fuel, 30, 41

E

Electrochemical corrosion potential, 335  
Equivalence theory, 30, 41

F

Fission matrix, 199  
Fourier transform, 224

G

Gadolinium  
  neutron capture measurements, 86  
  resonance parameters, 86

Gap metric, 154  
Generalized singular eigenfunctions, 224  
Global stability, 154

H

Heat transfer, 301  
Helium-3, 341  
H-infinity, 154  
Hydrogen water chemistry, 335

L

Lagrange interpolation, 273  
Legendre moments, 182  
Linear matrix inequalities, 154

M

Medical isotopes, 301  
Method of characteristics, 69  
Method of manufactured solutions, 1  
Molybdenum production, 123  
Monte Carlo, 199  
  hybrid method, 69  
Multigroup transfer cross section, 182

N

Natural convection, 141  
Neutron detection efficiency  
  correction, 341  
Neutron energy discrimination, 117

O

On the fly, 209

P

Plasma temperature, 117  
PWR core multimodel, 154

R

Ray effect, 273  
Reactor physics, 30, 41  
Reactor safety, 123  
Resonance  
  interference, 247  
  treatment, 30, 41

S

SAMMY fitting, 86  
Self-shielding, 30, 41  
  embedded method, 247  
  spatial, nonuniform temperature, 247  
Serpent, 286  
Single-phase  
  turbulent mixing rate, 172  
 $S_N$  method, 1  
Solution reactor, 301  
Spatial discretization methods, 1  
Standardized time series, 58  
Statistical error, 58  
Steam explosions, 312  
Subchannel analysis, 172

T

Thermal hydraulics, 123  
TRIGA, 141  
Two-body interactions of neutrons, 341

U

Uncertainty, 345

V

VHTR, 30, 41

Y

Yield data  
  conversion, 341
