

Nuclear Science and Engineering

VOLUME 182 · NUMBER 1 · JANUARY 2016

Special Issue on the RELAP-3D Computer Code

Contents

- iii Foreword
G. L. Mesina
- v A History of RELAP Computer Codes
G. L. Mesina

TECHNICAL PAPERS

- 1 Extremely Accurate Sequential Verification of RELAP5-3D
G. L. Mesina, D. L. Aumiller, F. X. Buschman

- 13 Standardized Consolidated Calculated and Reference Experimental Database (SCCRED):
A Supporting Tool for V&V and Uncertainty Evaluation of Best-Estimate System Codes
for Licensing Applications
A. Petruzzi, F. D'Auria

- 54 Hyperbolicity Criteria for System of Field Equations of One-Dimensional Two-Phase
Flow with Compressible Components
Igor Arshavsky

- 71 Development of Governing Equations Based on Six Fields for the RELAP Code
Glenn A. Roth, Fatih Aydogan

- 83 Modeling Moving Systems with RELAP5-3D
G. L. Mesina, D. L. Aumiller, F. X. Buschman, M. R. Kyle

- 96 Implementation and Assessment of Moody Homogeneous Equilibrium Critical Flow
Model of RELAP5-3D
Liang-Che Dai, Chung-Yu Yang, Yng-Ruey Yuann, Bau-Shei Pei, Chun-Kuan Shih

- 104 New Simulation Schemes and Capabilities for the PHYSICS/RELAP5-3D Coupled Suite
C. Rabiti, A. Alfonsi, A. Epiney

- 119 Qualitative and Quantitative Evaluation of Coupling Approaches for Coupling of
RELAP5 and LabVIEW
Zheng Fu, Joshua Pack, Fatih Aydogan
