

Nuclear Science and Engineering

VOLUME 184 · NUMBER 1 · SEPTEMBER 2016

Contents

TECHNICAL PAPERS

- 1 Inverse Predictive Modeling of a Spent-Fuel Dissolver Model
James J. Peltz, Dan G. Cacuci
- 16 The Second-Order Adjoint Sensitivity Analysis Methodology for Nonlinear Systems—I: Theory
Dan G. Cacuci
- 31 The Second-Order Adjoint Sensitivity Analysis Methodology for Nonlinear Systems—II: Illustrative Application to a Nonlinear Heat Conduction Problem
Dan G. Cacuci
- 53 Continuous-Energy Sensitivity Coefficients in the MORET Code
Alexis Jinaphanh, Nicolas Leclaire, Bertrand Cochet
- 69 Testing the Sampling-Based NUSS-RF Tool for the Nuclear Data-Related Global Sensitivity Analysis with Monte Carlo Neutronics Calculations
Ting Zhu, Alexander Vasiliev, Hakim Ferroukhi, Dimitri Rochman, Andreas Pautz
- 84 A Phonon-Based Covariance Methodology for ENDF $S(\alpha, \beta)$ and Thermal Neutron Inelastic Scattering Cross Sections
Jesse C. Holmes, Ayman I. Hawari, Michael L. Zerkle

TECHNICAL NOTES

- 114 Angle-Dependent Double-Differential Neutron Emission Cross Sections of ${}^3\text{H}(t,n)$ Between 5.98 and 19.14 MeV and Evidence of ${}^4\text{H}$ as Intermediate Reaction Product
M. Drog, M. M. Steurer, E. Jericha, D. M. Drake
- 125 Passive Detection of Small Low-Emission Sources: Two-Dimensional Numerical Case Studies
A. Olson, A. Ciabatti, Y. Hristova, P. Kuchment, J. Ragusa, M. Allmaras
