

## Subject Index

Volume 189 · Numbers 1, 2, and 3  
January, February, and March 2018

- Assembly deformation, 41  
 CMFD, 272  
 Collision probability, 101  
 Comet Critical Assembly, 93  
 Computational fluid dynamics,  
     135, 282  
 Core power, 56  
  
 Dancoff factor, 243  
 Discrete element method, 135  
 Discrete ordinates, 259  
     angular adaptive, 120  
     goal oriented, 120  
  
 Finite element method, 69  
 Fluid-elastic instability, 290  
 Fluid-structure interaction, 82  
 Form function method, 224  
 Fuel cladding, 69  
  
 Generalized perturbation theory,  
     171  
 Global conservation, 259  
  
 High Flux Isotope Reactor, 82  
 High-temperature reactors, 101, 243  
 HORUS3D/N, 188  
  
 Integral experiment, 93  
 Integral transport theory, 101, 243  
 Intrapin power reconstruction, 224  
  
 Jules Horowitz Reactor, 188  
  
 Lead void reactivity worth, 93  
 Least squares, 259  
 LR-NDA, 272  
  
 McCARD, 171  
 Monte Carlo, 152, 171, 199  
     continuous energy, 26  
  
 Neutronics, 188  
 Neutron transport, 272  
 Nonlinear diffusion acceleration, 272  
 Nonlinear regression, 56  
  
 Particle splitting, 152  
 p-CMFD acceleration, 26  
  
 Pebble bed reactor, 135  
 Pinwise reactor analysis, 224  
 Probability distribution of neutron  
     number, 1  
  
 Reactivity changes, 41  
 Reactivity-initiated accident, 69  
 Real variance reduction, 26  
 Research reactor, 56  
 Russian roulette, 152  
  
 Scaling experiment, 282  
 Sensitivities, 199  
 Sodium-cooled fast reactor, 41  
 System dimensions, 199  
  
 Thermal hydraulics, 82  
 Time and phase-space dependent  
     master equation, 1  
 Tube bundles, 290  
 Two-phase flow, 290  
  
 Vortex diode, 282
