TWELFTH TARGET FABRICATION SPECIALISTS' MEETING

- iii Comments / *George Miley*
- v Guest Editor's Comments / *Larry R. Foreman*

TECHNICAL PAPERS

- 81 Thickness Distribution for Gold and Copper Electroformed Hohlräume / *F. Elsner*
- 85 The Production of Surface Profiles on Target Components / *Robert P. Keatch, Brian Lawrenson, F. Barrie Lewis, Tony C. Tyrrell*
- 90 The Fabrication of Double Shell Targets for Nova / *J. R. Duke, N. E. Elliott, J. E. Moore, V. M. Gomez, R. Manzanares, G. Rivera, R. Watt, W. S. Varnum, P. L. Gobby*
- 95 In-Situ Polymerization of Foam Filled Laser Targets with Two Regions of Different Densities, Separated by a Thin Film / *Colin J. Horsfield, Wigen Nazarov, Kevin Oades*
- 101 Microengineering Techniques for Fabricating Planar Foils for Use in Laser Targets / *Robert P. Keatch, Brian Lawrenson, F. Barrie Lewis, Tony C. Tyrrell*
- 106 Toward the Fabrication of a NIF Target via Hemisphere Joining / *R. W. Margevicius, L. J. Salzer, M. A. Salazar, L. R. Foreman*
- 115 Evaluation of Boron-Doped Beryllium as an Ablator for NIF Target Capsules / *R. McEachern, C. Alford*
- 119 Effects of Joining and Testing Parameters on the Adhesive Strength of Epoxy-Bonded Aluminum and Beryllium / *Mike A. Salazar, Robert Hermes, Robert W. Margevicius*
- 123 The Design, Fabrication and Testing of Beryllium Capsules for Resonant Ultrasound Experiments / *Mike A. Salazar, Lee Salzer, Robert Day*
- 126 Ultrasonically Determined Fill Pressure and Density in Closed Spherical Shells / *Thomas J. Asaki*
- 131 Fabrication of Polyimide Shells by Vapor Phase Deposition for Use as ICF Targets / *E. L. Alfonso, F.-Y. Tsai, S.-H. Chen, R. Q. Gram, D. R. Harding*
- 138 Polyimide Films from Vapor Deposition: Toward High Strength, NIF Capsules / *C. Chad Roberts, Stephan A. Letts, Michael D. Saculla, Edmund J. Hsieh, Robert C. Cook*
- 147 Modeling of the Centering Force in a Compound Emulsion to Make Uniform Plastic Shells for Laser Fusion Targets / *T. Norimatsu, Y. Izawa, K. Mima, P. M. Gresho*

(Continued)

CONTENTS / MARCH 1999—VOL. 35, NO. 2

(Continued)

- 157 Some Aspects of the Hydrodynamics of the Microencapsulation Route to NIF Mandrels / *P. M. Gresho*
- 189 Fabrication of a Thin-Walled Plastic Shell Using Emulsion Technique / *Hitoshi Nakano, Tsuyoshi Fukuda*
- 194 Microencapsulation Process Factors Which Influence the Sphericity of 1 mm o.d. Poly(α -Methylstyrene) Shells for ICF / *B. W. McQuillan, A. Greenwood*
- 198 The Use of CaCl_2 and Other Salts to Improve Surface Finish and Eliminate Vacuoles in ICF Microencapsulated Shells / *B. W. McQuillan, F. H. Elsner, R. B. Stephens, L. C. Brown*
- 202 Bounce Coating Induced Domes on Glow Discharge Polymer Coated Shells / *A. Nikroo, D. Woodhouse*
- 206 New Approaches to the Preparation of P α MS Beads as Mandrels for NIF-Scale Target Capsules / *Robert Cook, Steven R. Buckley, Evelyn Fearon, Stephen A. Letts*
- 212 Thin Sputtered Glass as a Permeation Barrier for Plasma Polymer Shells / *A. Nikroo, D. A. Steinman*
- 216 Strengthening Large Thin Glass Shells by Overcoating with GDP / *D. Steinman, A. Nikroo, D. Woodhouse*
- 220 Enlargement of Glass and Plastic Shells to 2 mm in Diameter by Redropping Through a Short Heated Tower / *A. Nikroo, D. A. Steinman*
- 224 Representative Surface Profile Power Spectra from Capsules Used in Nova and Omega Implosion Experiments / *Robert C. Cook, Randall L. McEachern, Richard B. Stephens*
- 229 Cryogenic D-T Fuel Layers Formed in 1 mm Spheres by Beta-Layering / *J. Sater, B. Koziolowski, G. W. Collins, E. R. Mapoles, J. Pipes, J. Burmann, T. P. Bernat*
- 234 Surface Roughness Statistics and Temperature Step Stress Effects for D-T Solid Layers Equilibrated Inside a 2 mm Beryllium Torus / *John D. Sheliak, James K. Hoffer*
- 244 Forming Uniform HD Layers in Shells Using Infrared Radiation / *D. N. Bittner, G. W. Collins, E. Monsler, S. Letts*
- 250 Stability Time of a DT-Filled Cryogenic ICF Target in a High Vacuum Environment / *Peter S. Ebey, James K. Hoffer*
- 255 Neutronics and Activation Analysis for the National Ignition Facility Cryogenic Target Positioner / *Jeffery F. Latkowski, Jorge J. Sanchez, Lee C. Pittenger*
- 260 Indirect-Drive ICF Target Concepts for the X-1 Z-Pinch Facility / *R. E. Olson, G. A. Chandler, M. S. Derzon, D. E. Hebron, J. S. Lash, R. J. Leeper, T. J. Nash, G. E. Rochau, T. W. L. Sanford, N. B. Alexander, C. R. Gibson*
