CONTENTS / DECEMBER 1991 — VOL. 20, No. 4 PART 2

Proceedings of the SIXTH INTERNATIONAL CONFERENCE ON EMERGING NUCLEAR ENERGY SYSTEMS Monterey, California, June 16–21, 1991

vii Comments / *George Miley*

ix Preface: Sixth International Conference on Emerging Nuclear Energy Systems / *Carl Henning*

OVERVIEW/ENERGY POLICY

515 Future Aspects of the Nuclear Fuel Cycle / *K. Ebert, H. Schmieder, J. Y. Barre, B. Sicard*

518 Problems of Risk Perception and Social Acceptance of Emerging Nuclear Systems / *V. Novikov, B. Wahlström*

524 A World Model to Estimate the Occupation Fraction of Atomic Energy in the Future Energy Supply / *Teruaki Ohnishi*

529 The Economic Evaluation of Emerging Nuclear Energy Systems / *K. A. Williams*

537 Stretching of Oil Reserves with High Temperature Gas Cooled Reactors (HTGRs) / *Dietrich Schwarz, Greg Pause*

ADVANCED FISSION REACTORS/NONELECTRICAL APPLICATIONS

Advanced Fission Reactors

545 A Gaseous Core Fission Reactor with Autonomously Oscillating Fuel Gas / *J. C. Kuijper, H. van Dam*

550 Improved Containment and Core Catcher for Future LWRs and FBRs / *H. H. Hennies, G. Kessler*

561 Nuclear Fission—An Emerging Nuclear Energy System / *Bertram Wolfe*

573 Advanced Reactor Development: The LMR Integral Fast Reactor Program at Argonne / *C. E. Till, R. Avery*

580 The Strengthening and Repair of Underground Structures: A New Approach to the Management of Nuclear Waste / *Stirling A. Colgate*

589 The GEYSER Reactor-Concept for District Heating and Seawater Desalination / *P. G. K. Doroszalai, G. Vécsey*

(Continued)

CONTENTS / DECEMBER 1991 –VOL. 20, NO. 4 PART 2

(Continued)

- 596 Technical Aspects, Economy and Viability of the Geyser Thermal Energy Converter / *Zs. Révész*
- 602 Intrinsic Fission Excursion Inhibition with Tandem-Isotope Temperature Triggers / *A. A. Harms, Z. Bilanovic, M. R. Eskandari*
- 605 Balancing the Fuel Equation with the Advanced Liquid Metal Reactor System (ALMRS) / *J. E. Quinn, M. L. Thompson, W. D. Burch, J. J. Laidler*
- 610 Physical Processes in the Boundary Layer of a Gas-Core Fission Reactor / *W. Boersma-Klein, J. Kistemaker*
- 615 Magnetically Stabilized Fluidized Bed Nuclear Fission Reactor / *Yoichi Watanabe, Jacob Appelbaum*
- 620 On the Concept of Enhanced Safety Reactors with Molten Salt Fuel and Coolant: A Study of Accidental Transient Processes / *E. U. Bashlakova, V. V. Ignatiev, S. V. Kirillov, V. M. Novikov, A. V. Puzirev*
- 627 Natural Circulation as a Factor Determining Nuclear Power Installation Self-Protectiveness: Calculational and Experimental Studies / *V. V. Ignatyev, S. A. Subbotin, A. V. Fomichev*

Nuclear Desalting

- 631 Introduction to Nuclear Desalting: A New Perspective / *S. Golan, R. Schleicher, G. Snyder, M. LaBar, C. Snyder*
- 636 Advanced Liquid Metal Reactor (ALMR) Desalinization/Electric Plant / *C. E. Boardman, C. R. Snyder*

Accelerator/Reactor Waste Transmutation

- 641 A New Concept for Accelerator Driven Transmutation of Nuclear Wastes / *Edward D. Arthur*
- 648 Target/Blanket Conceptual Designs for the Los Alamos Accelerator Transmutation of Nuclear Waste (ATW) Concept / *Michael W. Cappiello, William J. Rider, John R. Ireland*
- 652 Accelerator Technology for Los Alamos Nuclear-Waste-Transmutation and Energy-Production Concepts / *G. P. Lawrence, R. A. Jameson, S. O. Schriber*
- 657 A Fast Breeder and Incinerator Assisted by a Proton Accelerator / *Hiroshi Takahashi*
- 664 New Transmutation Method by Using Moving Target / *K. Konashi, N. Sasao, P. Louvet, I. Sato, Y. Hirao*
- 673 A Concept of Actinide Transmutation with Intense Proton Accelerator / *H. Takada, T. Takizuka, I. Kanno, T. Nishida, M. Akabori, Y. Kaneko*
- 678 High Flux Particle Bed Reactor Systems for Rapid Transmutation of Actinides and Long Lived Fission Products / *M. Todosow, H. Ludewig, H. Takahashi, J. Powell*

(Continued)

CONTENTS / DECEMBER 1991 –VOL. 20, NO. 4 PART 2

(Continued)

- 683 Possibility of Realization of Ecologically Acceptable Fuel Cycle on the Basis of Deuteron High-Toxic Waste Burner / *Yu. M. Ado, A. G. Ufimtsev, V. V. Artisyuk, A. Yu. Konobeyev, Yu. A. Korovin, V. M. Murogov*
- 689 Radioactive Waste Transmutation in the Muon Catalyzed Fusion Reactor / *V. V. Artisyuk, Yu. A. Korovin, A. Yu. Konoveyev, V. N. Sosnin*

SPACE NUCLEAR POWER/PROPULSION

- 693 Nuclear Rocket Propulsion—The Past is Prelude / *Milton Klein*
- 698 Nuclear Rocketry Review / *R. J. Bohl, F. P. Durham, W. L. Kirk*
- 710 The Nuclear Powered Electrodynamical Plasma Accelerator as a Rocket Engine for Interplanetary Spacecraft / *I. K. Konkashbaev, V. V. Sidnev, Yu. V. Skvortsov, V. E. Cherkovets*
- 714 System Requirements for Low-Earth-Orbit Launch Using Laser Propulsion / *R. J. Lawrence, J. T. Kare, R. M. Zazworsky, D. K. Monroe*
- 719 Energy Production Using Fission Fragment Rockets / *George Chapline, Yoshiyuki Matsuda*
- 723 High Temperature Gas Heating by Fission Fragments Deposition / *V. V. Glaskov, O. A. Sinkevich*
- 725 A Fission Fragment Reactor Concept for Nuclear Space Propulsion / *A. J. Suo-Anttila, E. J. Parma, S. A. Wright, M. E. Vernon, P. S. Pickard*
- 730 Deflagration Plasma Thruster, A High Thrust, High Specific Impulse Device for Nuclear Space Propulsion / *Dah Yu Cheng*
- 735 The Dense Plasma Focus Fusion Thruster for Space Propulsion / *C. L. Leakeas, C. K. Choi, F. B. Mead*
- 741 Rotating Fluidized Bed Reactor for Space Power and Propulsion: A Status Report / *O. C. Jones*
- 747 Light Weight Space Power Reactors for Nuclear Electric Propulsion / *H. Ludewig, S. Mughabghab, O. Lazareth, K. Perkins, E. Schmidt, J. R. Powell*
- 753 FALCON Reactor-Pumped Laser Technology for Space Power Applications / *D. A. McArthur, G. N. Hays, P. S. Pickard*
- 759 Low Power Incore Thermionic Space Reactor Design Concepts Using Advanced Technology / *A. C. Klein, R. A. Pawlowski, H. H. Lee*

ADVANCED FUSION SYSTEMS/APPLICATIONS

Inertial Confinement Fusion

- 769 Recent Inertial Fusion Research at Osaka / *C. Yamanaka*
- 774 Beam Smoothing Techniques and Their Implications on ICF X-Ray Lasing Target Performance / *Ximing Deng*

(Continued)

CONTENTS / DECEMBER 1991 –VOL. 20, NO. 4 PART 2

(Continued)

- 776 Inertial Confinement Fusion Using the Compact Torus Accelerator / *C. W. Hartman, J. L. Eddleman, J. H. Hammer, B. G. Logan, H. S. McLean, R. W. Moir, A. W. Molvik*
- 787 Magnetic Confinement Fusion Research and Fusion-Fission Hybrid Reactor Project in China / *L. J. Qiu*
- 792 Ion Cluster Stopping in Cold Targets for ICF / *C. Deutsch*
- 797 Cluster Impact Hot Fusion / *Y. E. Kim, M. Rabinowitz, Y. K. Bae, G. S. Chulick, R. A. Rice*
- 808 Progress on Inertial Fusion Energy Reactor Studies / *W. R. Meier, M. J. Monsler, R. F. Bourque, I. N. Sviatoslavsky*
- 813 Atomic Physics for ICF Studies: Stopping Power and Opacities / *T. Błęński, J. Ligou, S. Morel*
- 819 Ignition Requirement for D³He Inertial Confinement Fusion / *T. Honda, Y. Nakao, Y. Honda, K. Kudo, Y. Wakuta, H. Nakashima, M. Ohta*
- 824 Nonthermal Nuclear Processes in Compressed DT Spheres / *Y. Nakao, T. Honda, Y. Honda, K. Kudo, H. Nakashima, M. Ohta*
- 829 The Promise of Magnetized Fuel: High Gain in Inertial Confinement Fusion / *I. R. Lindemuth, R. C. Kirkpatrick*
- 834 Ignition and Burn in Inertially Confined Magnetized Fuel / *R. C. Kirkpatrick, I. R. Lindemuth*
- 838 Energetic Alpha Particle Deposition in a Magnetized Plasma / *D. P. Smitherman, R. C. Kirkpatrick*
- Electrostatic Confined Fusion**
- 843 A Novel Ion Beam Source for Electrostatic Confined Fusion Reactors / *H. Kislev, M. A. Gundersen, G. H. Miley*
- 850 Advantages of Inertial-Electrostatic Confinement Fusion / *J. Nadler, T. Hochberg, Y. Gu, O. Barnouin, G. Miley*
- Magnetic Fusion Reactors/Beam-Driven Systems**
- 858 A Small Fusion Reactor Based on the Dense Z-Pinch / *A. E. Robson*
- 863 Field-Reversed Configurations—An Option for Fusion? / *Winfried Kernbichler*
- 868 Scaling Law Studies of Global Energy Confinement Times for Tokamaks with Ion Cyclotron Resonance Heating / *Shih-Hai Li, Ren-Chu Chin*
- 873 Feasibility Studies of Advanced Bootstrap Driven Tokamaks / *M. J. Alava, S. J. Karttunen, R. R. E. Salomaa*

(Continued)

CONTENTS / DECEMBER 1991 –VOL. 20, NO. 4 PART 2

(Continued)

- 879 Charged Particle Trajectories Focusing in Toroidal Magnetic Field Created by Current Carrying Ring Wire / *B. Jenko, A. Paulin*
- 883 BISERM, Neutron and Proton Data Library for Evaluation of Irradiation Effects in Structural Materials in the Energy Range up to 800 MeV / *Yu. A. Korovin, A. Yu. Konobeyev, V. N. Sosnin*
- 888 Neutronics Studies of Fusion Blankets: Results on a Simulated Lithium-Lead Module / *S. Azam, M. Schaer, J.-P. Schneeberger, A. Kumar*
- 894 Multi-Turn Electron-Ion Injection Study for Neutralized High-Density Beam Sustaining in a Closed Configuration / *A. Tarditi*
- 899 Progress Towards a Neutralized Beam Experiment for a Colliding-Beam, Advanced-Fuel Fusion Process / *P. G. Avanzini, A. Tarditi*

Muon-Catalyzed and Cold Fusion

- 904 Muon Catalyzed Fusion Chain-Length Extension Under Compressive Conditions / *G. Cripps, A. A. Harms, B. Goel*
- 909 Theoretical Issues in Muon Catalyzed Fusion / *Lali Chatterjee, Amal Chakravorty*
- 912 Comparative Aspects of Muonic and Amuonic Cold Fusion / *L. Chatterjee, G. Das, S. Mandal*
- 915 Nuclear Reactions in Deuterided Solids Versus Excess Heat Claims / *Steven E. Jones*
- 924 The Investigation of Deuterium Nuclei Fusion at Glow Discharge Cathode / *A. B. Karabut, Ya. R. Kucherov, I. B. Savvatimova*
- 929 Cold Fusion is Confirmed / *Fuad Turanciol*

FUSION-FISSION HYBRIDS

- 945 A Suggestion on Hybrid Blanket with the Combination of Fast-Fission and Fission-Suppressed Modes / *Shounan Li, Shaojie Wang, Keqiang Ruan*
- 949 The Role of Fusion Breeders in the Development of Nuclear Energy in China / *Shonnan Li*
- 954 On the Requirements for Nuclear Design of a Competitive Fusion Breeder / *Stefan Taczanowski, Peter Gronck*
- 959 Pebble Bed Blanket Concept for Fusion Reactor / *Dong-Xing Cao*
- 964 Hybrid Reactor Performances to Optimize the Nuclear Fission Fuel Cycle / *M. Piera, J. M. Martínez-Val, J. M. Perlado*
- 969 Conception of a Combined ICF Power Plant and a Fission Reactor-Laser Driver / *P. P. Dyachenko, A. V. Zrodnikov, V. N. Kononov, V. Ya. Pupko, V. V. Korobkin, A. M. Prokhovov*

(Continued)

CONTENTS / DECEMBER 1991 –VOL. 20, NO. 4 PART 2

(Continued)

ADVANCED ENERGY CONVERSION/STORAGE AND EXOTIC CONCEPTS

- 979 Review of Direct Conversion of Nuclear Energy / *G. H. Miley*
- 987 Near Term Recycling Option Using Fusion Grade Plasmas / *Bernard J. Eastlund, William C. Gough*
- 992 Compact Fusion Advanced Rankine (CFAR II) Power Cycle / *B. Grant Logan*
- 1001 Inherently Safe Nuclear-Driven Internal Combustion Engines / *Peter Alesso, Tze-Show Chow, Ralph Condit, John Heidrich, Joseph Pettibone, Ronald Streit*
- 1006 The Production of Tunable Coherent Gamma Rays from Accelerated Positronium / *Hiroshi Takahashi*
- 1012 A Realistic, Gradual and Economical Approach to Fusion Power / *A. Szöke, R. W. Moir*
- 1022 Muon Catalyzed Fusion / *L. I. Ponomarev, C. Petitjean*

ANTIMATTER ENERGY SOURCES

- 1035 Antimatter Annihilation Papers / *Bruno W. Augenstein*
- 1040 Prospects for Efficient Use of Annihilation Energy / *Johndale C. Solem*
- 1046 Antiproton Boosted Microfission / *R. A. Lewis, G. A. Smith, R. J. Kanzleiter, K. Higman, R. Newton*
- 1051 Initial Investigation of the Feasibility of Antiproton-Catalyzed Inertial Confinement Fusion / *Denis E. Beller, Charles R. Martin*

NUCLEAR REACTIONS/ISOTOPE SEPARATION

- 1059 Particle and Energy Chaining in Nuclear Reaction Dynamics / *K. F. Schoepf, A. A. Harms*
