

# Nuclear Science and Engineering

VOLUME 190 · NUMBER 2 · MAY 2018

## Contents

### TECHNICAL PAPERS

- 105** Second-Order Sensitivity Analysis of Uncollided Particle Contributions to Radiation Detector Responses  
*Dan G. Cacuci, Jeffrey A. Favorite*
- 134** Improved Variational Nodal Method Based on Symmetry Group Theory  
*Yunzhao Li, Zhipeng Li, Hongchun Wu, Youqi Zheng*
- 156** The Improvement of Coupling Method in TINTE by Fully Implicit Scheme  
*Han Zhang, Jiong Guo, Jianan Lu, Fu Li, Yunlin Xu, T. J. Downar*
- 176** Limiting Surface Density Method Adapted to Large Arrays of Heterogeneous Shipping Packages with Nonlinear Responses  
*Tracy E. Stover, James S. Baker, Michael D. Ratliff, Gretchen C. Mitschelen*
- 195** Experimental Investigation on the Effect of Spacer on the Turbulent Mixing in Vertical Pressure Tube-Type Boiling Water Reactor  
*Shashi Kant Verma, S. L. Sinha, D. K. Chandraker*
