

Nuclear Technology

VOLUME 205 · NUMBER 5 · MAY 2019

Contents

TECHNICAL PAPERS

- 637** Particle Swarm Optimization Applied to the Nuclear Fuel Bundle Spacer Grid Spring Design
Victor C. Leite, Roberto Schirru, Miguel Mattar Neto
- 646** Estimation of the Release Time of Radio-Tellurium During the Fukushima Daiichi Nuclear Power Plant Accident and Its Relationship to Individual Plant Events
Sentaro Takahashi, Shigeto Kawashima, Akihide Hidaka, Sota Tanaka, Tomoyuki Takahashi
- 655** Modeling of Aerosol Fission Product Scrubbing in Experiments and in Integral Severe Accident Scenarios
Adolf Rýdl, Leticia Fernandez-Moguel, Terttaliisa Lind
- 671** Effects of Cerium Concentration and Solvent on Physical and Chemical Characterization of Rapid Setting Cement
Riyadh M. Motny, Supathorn Phongikaroon
- 684** Total Hemispherical Emissivity of Potential Structural Materials for Very High Temperature Reactor Systems: Alloy 617
Kyle L. Walton, Raymond K. Maynard, Tushar K. Ghosh, Robert V. Tompson, Dabir S. Viswanath, Sudarshan K. Loyalka
- 694** Experimental Study of High Energy Arcing Faults Using Medium Voltage Metalclad Switchgears
Hajime Kabashima, Fumio Kasahara
- 708** Conceptual Design of a Pilot-Scale Pyroprocessing Facility
Yoon Il Chang, Robert W. Benedict, Matthew D. Bucknor, Javier Figueroa, Joseph E. Herceg, Terry R. Johnson, Eugene R. Koehl, Richard M. Lell, Young Soo Park, Chad L. Pope, Stanley G. Wiedmeyer, Mark A. Williamson, James L. Willit, Reid James, Steve Meyers, Bryan Spaulding, John Underdahl, Mike Wolf
- 727** Demonstration of Hollow Fiber Membrane Technique for the Recovery of Plutonium from Analytical Laboratory Waste
S. Chaudhury, S. A. Ansari, P. K. Mohapatra, D. M. Noronha, J. S. Pillai, Ashutosh Srivastava, I. C. Pius

—continued—

Contents continued

VOLUME 205 · NUMBER 5 · MAY 2019

736 Design and Characterization of a Scintillator-Based Position-Sensitive Detector for Muon Imaging

Can Liao, Haori Yang, Zhengzhi Liu, Jason P. Hayward

RAPID COMMUNICATION

748 FHR, HTGR, and MSR Pebble-Bed Reactors with Multiple Pebble Sizes for Fuel Management and Coolant Cleanup

Charles W. Forsberg, Per F. Peterson
