

# Nuclear Technology

VOLUME 206 · NUMBER 11 · NOVEMBER 2020

## Special issue on Salt-Cooled Reactors

### Contents

- iii Foreword  
*Charles Forsberg, Farzad Rahnema*

### CRITICAL REVIEWS

- 1625 A Critical Review of Fluoride Salt Heat Transfer  
*Karl Britsch, Mark Anderson*
- 1642 Heat-Pipe Heat Exchangers for Salt-Cooled Fission and Fusion Reactors to Avoid Salt Freezing and Control Tritium: A Review  
*Bahman Zohuri, Stephen Lam, Charles Forsberg*

### TECHNICAL PAPERS

- 1659 Market Basis for Salt-Cooled Reactors: Dispatchable Heat, Hydrogen, and Electricity with Assured Peak Power Capacity  
*Charles W. Forsberg*
- 1686 A Stylized 3-D Benchmark Problem Set Based on the Pin-Fueled SmaHTR  
*K. Lisa Reed, Farzad Rahnema, Dingkang Zhang, Dan Ilas*
- 1698 Steady-State Thermal-Hydraulic Model for Fluoride-Salt-Cooled Small Modular High-Temperature Reactors  
*Sriram Chandrasekaran, Srinivas Garimella*
- 1721 Convective and Radiative Heat Transfer in Molten Salts  
*Sheng Zhang, Xiaodong Sun*
- 1740 Power Profile Reconstruction and Anomaly Detection Approach for FHRs Using Cerenkov Radiation  
*Jason A. Hearne, Pavel V. Tsvetkov*
- 1751 Corrosion Behavior of Pre-Carburized Hastelloy N, Haynes 244, Haynes 230, and Incoloy 800H in Molten FLiNaK  
*Kevin J. Chan, Preet M. Singh*

—continued—

## Contents continued

VOLUME 206 · NUMBER 11 · NOVEMBER 2020

- 1769** Electrochemical Separation of Lanthanum Oxide in Molten FLiNaK Salt  
*Qiufeng Yang, Jianbang Ge, Yafei Wang, Jinsuo Zhang*
- 1778** Fusion Blankets and Fluoride-Salt-Cooled High-Temperature Reactors with Flibe Salt Coolant: Common Challenges, Tritium Control, and Opportunities for Synergistic Development Strategies Between Fission, Fusion, and Solar Salt Technologies  
*Charles Forsberg, Guiqiu (Tony) Zheng, Ronald G. Ballinger, Stephen T. Lam*
