

## Selected papers from the 2021 International Conference on Mathematics and Computational Methods Applied to Nuclear Science and Engineering (M&C 2021)

### Contents

iii Foreword

*Patrick S. Brantley, Dmitriy Y. Anistratov, Todd J. Urbatsch*

### TECHNICAL PAPERS

145 Asymptotic Diffusion Limits of the Multigroup Neutron Transport Equations

*Edward W. Larsen*

164 Toward a More Realistic Analysis of Neutron Clustering

*Thomas M. Sutton*

176 Theoretical Derivation of a Unique Combination Number Hidden in the Higher-Order Neutron Correlation Factors Using the Pál-Bell Equation

*Tomohiro Endo, Fuga Nishioka, Akio Yamamoto, Kenichi Watanabe, Cheol Ho Pyeon*

189 A Stochastic Transport Model for the Cumulative Number of Fissions and Deposited Fission Energy

*Anil K. Prinja, Patrick F. O'Rourke*

212 A Limited-Memory Framework for Conditional Point Sampling for Radiation Transport in 1D Stochastic Media

*Emily H. Vu, Aaron J. Olson*

233 Parametric Model-Order Reduction for Radiation Transport Simulations Based on an Affine Decomposition of the Operators

*Patrick Behne, Jan Vermaak, Jean Ragusa*

262 The NILO-CMFD Method for Iteratively Solving Coupled Neutron Transport–Thermal Hydraulics Problems

*Nickolas J. Adamowicz, Annalisa Manera, Edward W. Larsen*

279 Frequency Transform Method for Transient Analysis of Nuclear Reactors in Monte Carlo

*Miriam A. Kreher, Samuel Shaner, Benoit Forget, Kord Smith*

—continued—

## Contents continued

VOLUME 197 · NUMBER 2 · FEBRUARY 2023

- 291** The Legendre Polynomial Axial Expansion Method  
*Nicholas F. Herring, Benjamin S. Collins, Thomas J. Downar, Aaron M. Graham*
- 308** A Multigroup Homogeneous Flux Reconstruction Method Based on the ANOVA-HDMR Decomposition  
*Pavel M. Bokov, Danniell Botes, Rian H. Prinsloo, Djordje I. Tomašević*
- 333** Spatially Dependent Resonance Self-Shielding in CASMO5  
*Rodolfo M. Ferrer, Joshua M. Hykes*
