

Selected papers from the 2024 Nuclear and Emerging Technologies for Space Topical Meeting (NETS 2024)

Contents

RESEARCH ARTICLES

- S1** The Graph Becomes the Dataset: Compiling Historical and Current RTG Data into One Place

Christofer E. Whiting, David F. Woerner

- S9** Range Safety Considerations for Processing and Launching Reactor-Based Space Nuclear Systems

A. P. Herbert, B. Fisher, M. Granger, M. Blood, N. DeSotel

- S17** Preliminary Modeling of Nuclear Thermal Propulsion Cores Using Nodal Diffusion Codes with Jacobian-Free Newton Krylov-Generated Discontinuity Factors

Jacob D. Smith, Dan Kotlyar

- S29** Thermophysical Properties of a Uranium Nitride-Molybdenum-Tungsten Composite Fuel for Nuclear Thermal Propulsion

Joseph Schaeperkoetter, Scarlett Widgeon Paisner, Joshua White, Erofil Kardoulaki, Timothy Coons, Adrien Terricabras, Darrin Byler, Jhonathan Rosales, Kenneth McClellan

- S39** Investigation of High-Temperature Compatibility of Select Oxides with Yttrium Hydride for Micro and Space Reactor Applications

R. H. Bohanon, A. P. Shivprasad, D. S. Cheu, M. A. Torrez, E. L. Tegtmeier, H. R. Trellue, E. P. Luther, R. P. Wilkerson, M. K. O'Brien, S. S. Raiman, C. A. Kohnert
