

Fusion technology

CONTENTS / NOVEMBER 1998—VOL. 34, NO. 3, PART 1

TECHNICAL PAPERS

- 187** Magnetohydrodynamic Flows in Porous Media II: Experimental Results / *Jon D. McWhirter, Michael E. Crawford, Dale E. Klein*
- 198** The Influence of External Body Forces on the Molten Depths in Tungsten During Plasma Disruptions / *George Tsotridis*
- 209** Demonstration of Large Shell Production Using Interfacial Polycondensation Reaction / *Hitoshi Nakano*
- 213** Corrosion Control and Management Strategy for Gaseous and Liquid Tritium in French Processing Plants / *G. Bellanger, J. J. Rameau*
- 234** Isotope Effect in Cryosorption of Tritium to Molecular Sieves and Activated Carbon at 77 K / *Masabumi Nishikawa, Ken-Ichi Tanaka, Mitsuru Uetake, Tomofumi Shiraishi*
- 241** Conservation of Angular Momentum in a Varying Magnetic Field / *Jeffery D. Lewins*
- 253** Nuclear Reaction by Three-Body Recombination Between Deuterons and the Nuclei of Lattice-Trapped D₂ Molecules / *Kjeld C. Engvild*
- 256** Anomalous Enhancement of Three-Body Deuteron Fusion in Titanium-Deuteride with Low-Energy D⁺ Beam Implantation / *Akito Takahashi, Katsuhiko Maruta, Kentaro Ochiai, Hiroyuki Miyamaru, Toshiyuki Iida*
- 273** On the Release of ³₁H from Cathodically Polarized Palladium Electrodes / *Stanislaw Szpak, Pamela A. Mosier-Boss*
