

# NUCLEAR SCIENCE AND ENGINEERING®

VOLUME 133, NUMBER 2, OCTOBER 1999

## CONTENTS

### TECHNICAL PAPERS

- |            |   |  |
|------------|---|--|
| <b>119</b> | Decomposition Principle for Refueling Optimization in Fast Breeder Reactors   | <i>Yasuyoshi Kato,<br/>Motomi Odamura,<br/>Hiroshi Urushihara,<br/>Hidesuke Matsushima</i>   |
| <b>147</b> | Analytical Calculation of the Average Dancoff Factor for a Fuel Kernel in a Pebble Bed High-Temperature Reactor               | <i>E. E. Bende, A. H. Hogenbirk,<br/>J. L. Kloosterman,<br/>H. van Dam</i>   |
| <b>163</b> | Applications of Monte Carlo Simulations of Thermalization Processes to the Nondestructive Assay of Graphite                   | <i>Felix C. Difilippo</i>  |
| <b>178</b> | Experimental Installation for Radioecology Research on Defined Ecosystems Subjected to Contamination in Controlled Conditions | <i>C. Madoz-Escande,<br/>F. Bréchignac, C. Colle,<br/>E. Dubois, J. Hugon,<br/>H. Jouplet, M. Moutier,<br/>P. Rongier, A. Sanchez,<br/>E. H. Schulte, R. Zanon</i> |
| <b>192</b> | A Mesh-Free Numerical Method for Direct Simulation of Gas-Liquid Phase Interface  | <i>Han Young Yoon,<br/>Seiichi Koshizuka,<br/>Yoshiaki Oka</i>   |
| <b>201</b> | A Two-Dimensional Intranodal Flux Expansion Method for Hexagonal Geometry   | <i>Ulrich Grundmann,<br/>Frank Hollstein</i>   |
| <b>213</b> | Shift and Adjusted Reference Temperature for a Boiling Water Reactor Vessel   | <i>L. C. Longoria, J. C. Palacios,<br/>J. Santos</i>   |
| <b>218</b> | Model Calculation of $n + {}^{12}\text{C}$ Reactions from 4.8 to 20 MeV   | <i>Jingshang Zhang, Yinlu Han,<br/>Ligang Cao</i>  |
