

NUCLEAR SCIENCE AND ENGINEERING®

VOLUME 135, NUMBER 1, MAY 2000

CONTENTS

TECHNICAL PAPERS

- | | | |
|----|---|--|
| 1 | Analysis of Differences in Void Coefficient Predictions for Mixed-Oxide-Fueled Tight-Pitch Light Water Reactor Cells | <i>Hironobu Unesaki,
Seiji Shiroya, Keiji Kanda,
Stéphane Cathalau,
Franck-Olivier Carré,
Otohiko Aizawa,
Toshikazu Takeda</i> |
| 23 | Measurement of Activation Reaction Rate Distributions in a Lead Assembly Bombarded with 500-MeV Protons | <i>Hiroshi Takada,
Shin-ichiro Meigo,
Toshinobu Sasa,
Kazufumi Tsujimoto,
Hideshi Yasuda</i> |
| 33 | Epithermal Inverse Kinetic Measurements and Their Interpretation Using a Two-Group Point-Kinetic Model | <i>Marc Rosselet,
Rakesh Chawla, Tony Williams</i> |
| 48 | Influence of the Thermal Cutoff Energy on the Calculation of Neutronic Parameters for Light Water Reactor Lattices | <i>Jean-Marie Paratte,
Sandro Pelloni</i> |
| 57 | Properties of a Cold-Neutron Irradiation Facility for In Vitro Research on Boron Neutron Capture Therapy at the Geesthacht Neutron Facility | <i>L. Lüdemann, R. Kampmann,
W. Sosaat, P. Staron, P. Wille</i> |
| 64 | Verification of the Neutron Flux of a Modified Zero-Power Reactor Using a Neutron Activation Method | <i>Lung Kwang Pan,
Cheng Si Tsao</i> |
| 73 | A Multigroup Albedo Method for Transport Calculations: Application to the Orphée Core | <i>S. Rauck, R. Sanchez,
I. Zmijarevic, M. Nobile</i> |
| 84 | Nuclide Importance and the Steady-State Burnup Equation | <i>Hiroshi Sekimoto,
Atsushi Nemoto</i> |
