

NUCLEAR SCIENCE AND ENGINEERING®

VOLUME 139, NUMBER 1, SEPTEMBER 2001

CONTENTS

TECHNICAL PAPERS

- | | | |
|----|---|--|
| 1 | Development of Methods for Calculation of Deuteron-Lithium and Neutron-Lithium Cross Sections for Energies up to 50 MeV | <i>A. Yu. Konobeyev, Yu. A. Korovin,
P. E. Pereslavytsev, Ulrich Fischer,
Ulrich von Möllendorff</i> |
| 24 | Threshold Reaction Cross Sections of Nickel Isotopes, Averaged Over a ^{235}U Fission Neutron Spectrum | <i>M. A. Arribére, S. Ribeiro Guevara,
P. M. Suárez, A. J. Kestelman</i> |
| 33 | Nonnegative Anisotropic Group Cross Sections: A Hybrid Monte Carlo–Discrete Elements–Discrete Ordinates Approach | <i>J. Mark DelGrande,
Kirk A. Mathews</i> |
| 47 | A Transport Condensed History Algorithm for Electron Monte Carlo Simulations | <i>Danny R. Tolar, Jr.,
Edward W. Larsen</i> |
| 66 | Neutron Transport in Spatially Random Media: Eigenvalue Problems | <i>M. M. R. Williams,
Edward W. Larsen</i> |
| 78 | A Spatial Kinetics Method Ensuring Neutronic Balance with Thermal-Hydraulic Feedback and Its Application to a Main Steam Line Break | <i>Yoshiro Asahi, Keisuke Okumura,
Yasuo Ose</i> |
| 96 | Genetic Algorithms for Estimating Effective Parameters in a Lumped Reactor Model for Reactivity Predictions | <i>Marzio Marseguerra, Enrico Zio</i> |

TECHNICAL NOTE

- | | | |
|-----|--|---|
| 105 | An Alternate Formulation of the Nodal Expansion Method | <i>Keqiang Ruan, Xiaogang Xue,
Xuedong Fu</i> |
|-----|--|---|
