

# NUCLEAR SCIENCE AND ENGINEERING®

VOLUME 143, NUMBER 2, FEBRUARY 2003

## CONTENTS

### TECHNICAL PAPERS

- |            |  |   |
|------------|--|---|
| <b>99</b>  | Methodology of Continuous-Energy Adjoint Monte Carlo for Neutron, Photon, and Coupled Neutron-Photon Transport                                   | <i>J. Eduard Hoogenboom</i>   |
| <b>121</b> | Monte Carlo Calculation of Sensitivities to Secondaries' Angular Distributions   | <i>R. L. Perel</i>  |
| <b>132</b> | Sensitivity Analyses for Polyethylene-Moderated and Polyethylene-Reflected Highly Enriched Uranium Experiments Mixed with Waste Matrix Materials | <i>David J. Loaiza, Rene Sanchez, Roger Brewer</i>                          |
| <b>141</b> | Optimization of Height-to-Diameter Ratio for an Accelerator-Driven System  | <i>Yonghee Kim, Won Seok Park, Tae Yung Song, Chang Kue Park</i>            |
| <b>158</b> | Statistical Analysis of Reactor Pressure Vessel Fluence Calculation Benchmark Data Using Multiple Regression Techniques                          | <i>John F. Carew, Stephen J. Finch, Lambros Lois</i>                        |
| <b>164</b> | Combining Intranuclear-Cascade and Preequilibrium Hauser-Feshbach Models for Nuclear Cross-Section Calculations Between 1 MeV and 5 GeV          | <i>C. Y. Fu, F. B. Guimaraes, L. C. Leal</i>                                |
| <b>177</b> | Neutron Capture Cross Section of $^{232}\text{Th}$   | <i>V. M. Maslov, Yu. V. Porodzinskij, M. Baba, A. Hasegawa</i>              |
| <b>188</b> | A Design Study for $^{99}\text{Tc}$ and $^{129}\text{I}$ Transmutation in the HYPER System   | <i>Won S. Park, Yong H. Kim, Chang K. Park, Jong S. Chung, Chang H. Kim</i> |

### TECHNICAL NOTE

- |            |   |  |
|------------|---|--|
| <b>202</b> | Calculation and Analysis of $n + ^{232}\text{Th}$ Reaction Cross Sections | <i>Yinlu Han, Qingbiao Shen, Jingshang Zhang, Zhengjun Zhang</i> |
|------------|---|--|
