

# NUCLEAR SCIENCE AND ENGINEERING®

VOLUME 149, NUMBER 1, JANUARY 2005

## CONTENTS

- |                             |   |  |
|-----------------------------|---|--|
| <b>vii</b>                  | Foreword: Nuclear Mathematical and Computational Sciences: A Century in Review – A Century Anew                       | <i>Yousy Y. Azmy</i>   |
| <br><b>TECHNICAL PAPERS</b> |   |  |
| <b>1</b>                    | Monte Carlo Electron Dose Calculations Using Discrete Scattering Angles and Discrete Energy Losses                    | <i>Brian C. Franke, Anil K. Prinja</i>   |
| <b>23</b>                   | A Case Study in Manual and Automated Monte Carlo Variance Reduction with a Deep Penetration Reactor Shielding Problem | <i>Herschel P. Smith,<br/>John C. Wagner</i>   |
| <b>38</b>                   | Stationarity Modeling and Informatics-Based Diagnostics in Monte Carlo Criticality Calculations                       | <i>Taro Ueki, Forrest B. Brown</i>   |
| <b>51</b>                   | Development of the CPXSD Methodology for Generation of Fine-Group Libraries for Shielding Applications                | <i>F. Arzu Alpan,<br/>Alireza Haghighat</i>  |
| <b>65</b>                   | Comprehensive Cross-Section Database Development for Generalized Three-Dimensional Radiation Transport Codes          | <i>Thomas M. Miller,<br/>Lawrence W. Townsend</i>  |
| <b>74</b>                   | A Polynomial Form for Higher-Order Accurate Quantification of Perturbation Effects in Nuclear Systems                 | <i>R. van Geemert, F. Tani</i>   |
| <b>88</b>                   | Some Features of Spatial Neutron Kinetics for Multiplying Systems   | <i>S. Dulla, P. Ravetto,<br/>M. M. Rostagno, G. Bianchini,<br/>M. Carta, A. D'Angelo</i> |
| <b>101</b>                  | Impact of Radionuclide Physical Distribution on Brachytherapy Dosimetry Parameters                                    | <i>M. J. Rivard, B. L. Kirk,<br/>L. C. Leal</i>  |
| <b>107</b>                  | Modified Nodal Integral Method for the Three-Dimensional, Time-Dependent, Incompressible Navier-Stokes Equations      | <i>Fei Wang, Rizwan-uddin</i>  |
