

NUCLEAR SCIENCE AND ENGINEERING®

VOLUME 152, NUMBER 1, JANUARY 2006

CONTENTS

TECHNICAL PAPERS

- 1 Determination of the $^{232}\text{Th}(n,\gamma)$ Cross Section from 4 to 140 keV at GELINA
A. Borella, K. Volev, A. Brusegan, P. Schillebeeckx, F. Corvi, N. Koyumdjieva, N. Janeva, A. A. Lukyanov
- 15 Comparison of Ramsauer and Optical Model Neutron Angular Distributions
D. P. McNabb, J. D. Anderson, R. W. Bauer, F. S. Dietrich, S. M. Grimes, C. A. Hagmann
- 23 Investigation of the Ramsauer Model for the Prediction of Neutron Cross Sections Below 120 MeV
R. S. Gowda, S. Ganesan
- 29 Generalization of the Variational Nodal Method to Spherical Harmonics Approximations in R - Z Geometry
Hui Zhang, E. E. Lewis
- 37 Development of Probabilistic Design Method for Fast Reactor Fuel Rod
T. Ozawa, T. Abe
- 48 A New Automatic Biasing Technique for Transport Monte Carlo Methods
Jean-Marc Depinay, Michel Caillaud, Remi Sentis
- 56 Implications of Monte Carlo Statistical Errors in Criticality Safety Assessments
Ronald E. Pevey
- 65 Results and Analysis of the Spherical ^{237}Np Critical Experiment Surrounded by Highly Enriched Uranium Hemispherical Shells
David Loaiza, Rene Sanchez, David Hayes, Charlene Cappiello
- 76 A Device for Nondestructive Experimental Determination of the Power Distribution in a Nuclear Fuel Assembly
P. Jansson, S. Jacobsson Svärd, A. Håkansson, A. Bäcklin
- 87 GAMMA Multidimensional Multicomponent Mixture Analysis to Predict Air Ingress Phenomena in an HTGR
Hong Sik Lim, Hee Cheon No
- 98 Electromagnetic Excitation Rates for Nuclear Isomers in a Hot Dense Plasma
T. C. Luu, J. L. Friar, A. C. Hayes

TECHNICAL NOTES

- 106 Identification of an Unknown Material in a Radiation Shield Using the Schwinger Inverse Method
Jeffrey A. Favorite, Keith C. Bledsoe
- 118 Improvement of Low-Pressure Subcooled Boiling Models in RELAP/MOD3.2 Code for Predicting Flow Instability
E. M. Dilla, J. Y. Tu, G. H. Yeoh
