

NUCLEAR SCIENCE AND ENGINEERING®

VOLUME 154, NUMBER 2, OCTOBER 2006

CONTENTS

TECHNICAL PAPERS

- 119** Analysis of Sample Irradiation Experiments in Phénix for JEFF-3.0 Nuclear Data Validation *J. Tommasi, E. Dupont, P. Marimbeau*
- 134** The Search for Superconvergence in Spherical Harmonics Approximations *Alain Hébert*
- 174** Temporal Accuracy of the Nonequilibrium Radiation Diffusion Equations Applied to Two-Dimensional Multimaterial Simulations *Vincent A. Mousseau, Dana A. Knoll*
- 190** Continuous-Energy Multidimensional S_N Transport for Problem-Dependent Resonance Self-Shielding Calculations *Zhaopeng Zhong, Thomas J. Downar, Yunlin Xu, Mark L. Williams, Mark D. DeHart*
- 202** Proton Source Efficiency for Heterogeneous Distribution of Actinides in the Core of an Accelerator-Driven System *Per Seltborg, Jan Wallenius*
- 215** Compton Current Generated by Nuclear Radiation: A Coupled Neutron-Gamma-Electron Transport Model *Gundra Kondayya, Aditi Ray*
- 223** Oxygen Control Technique in Molten Lead and Lead-Bismuth Eutectic Systems *Jinsuo Zhang, Ning Li, Yitung Chen*
- 233** Lead- and Bismuth-Borate Fly-Ash Glasses as Gamma-Ray-Shielding Materials *Kulwant Singh, Ashutosh Goel, Shaweta Mohan, Annu Arora, Gopi Sharma*
- 241** A Data Identification Method for the Improvement of a Cross-Section Model *Aldo Dall'Osso*

COMPUTER CODE ABSTRACT

- 247** A General Method of Conserving Mass in Complex Geometry Simulations on Mesh Grids and Its Implementation in BOT3P5.0 *Roberto Orsi*
