

## SPECIAL ON ACCELERATOR APPLICATIONS

- 1 Foreword / *L. Warren Funk*

### TECHNICAL PAPERS

- 3 Thermal-Hydraulic Design of the Accelerator Production of Tritium Tungsten Neutron Source / *Kemal O. Pasamehmetoglu, Gordon J. Willcutt, Jr., Jay S. Elson, Donald A. Siebe*
- 15 Disposition of Nuclear Waste Using Subcritical Accelerator-Driven Systems: Technology Choices and Implementation Scenarios / *Francesco Venneri, Mark A. Williamson, Ning Li, Michael G. Houts, Richard A. Morley, Denis E. Beller, William Sailor, George Lawrence*
- 30 Nuclear Simulation and Radiation Physics Investigations of the Target Station of the European Spallation Neutron Source / *Detlef Filges, Ralf-Dieter Neef, Hartwig Schaal*
- 49 Target Systems Overview for the Spallation Neutron Source / *Tony A. Gabriel, John M. Barnes, Lowell A. Charlton, James DiStefano, Ken Farrell, John Haines, Jeffrey O. Johnson, Louis K. Mansur, Steve J. Pawel, Moshe Siman-Tov, Rusi Taleyarkhan, Mark W. Wendel, Thomas J. McManamy, Mark J. Rennich*
- 61 Intensity and Spectra of a White Light Neutron Source Produced by a 70-MeV Proton Accelerator / *Qing Biao Shen*
- 66 Once-Through Thermal-Spectrum Accelerator-Driven Light Water Reactor Waste Destruction Without Reprocessing / *Charles D. Bowman*
- 94 Neutronic Design Studies for the Spallation Neutron Source / *Lowell A. Charlton, John M. Barnes, Jeffrey O. Johnson, Tony A. Gabriel*
- 103 The Accelerator Production of Tritium Materials Test Program / *Stuart A. Maloy, Walter F. Sommer, Michael R. James, Tobias J. Romero, Manuel R. Lopez, Eugene Zimmermann, James M. Ledbetter*
- 115 Target/Blanket Design for the Accelerator Production of Tritium Plant / *Michael W. Cappiello, Paul W. Lisowski*
- 

### TECHNICAL PAPERS

#### FISSION REACTORS

- 128 Benchmark Calculations for Standard and DUPIC CANDU Fuel Lattices Compared with the MCNP-4B Code / *Gyuhong Roh, Hangbok Choi*

(Continued)

# CONTENTS / OCTOBER 2000—VOL. 132, NO. 1

(Continued)

## THERMAL HYDRAULICS

- 152** Mitigation Measures Following a Loss-of-Residual-Heat-Removal Event During Shutdown / *Kwang Won Seul, Young Seok Bang, Hho Jung Kim*
- 167** Analysis of an Advanced Test Reactor Small-Break Loss-of-Coolant Accident with an Engineered Safety Feature to Automatically Trip the Primary Coolant Pumps / *Steven T. Polkinghorne, Cliff B. Davis, Richard T. McCracken*
