

### OECD/NRC MSLB BENCHMARK SPECIAL

- 93** Introduction to the Special Issues on the Organization for Economic Cooperation and Development/U.S. Nuclear Regulatory Commission Pressurized Water Reactor Main Steam Line Break Benchmark / *Kostadin N. Ivanov, Enrico Sartori*

### TECHNICAL PAPERS

- 95** Using the OECD/NRC Pressurized Water Reactor Main Steam Line Break Benchmark to Study Current Numerical and Computational Issues of Coupled Calculations / *Kostadin N. Ivanov, Nadejda K. Todorova, Enrico Sartori*
- 116** Effects of Secondary Circuit Modeling on Results of Pressurized Water Reactor Main Steam Line Break Benchmark Calculations with New Coupled Code TRAB-3D/SMABRE / *Antti Daavittila, Anitta Hämäläinen, Riitta Kyrki-Rajamäki*
- 124** Analysis of the Pressurized Water Reactor Main Steam Line Break Benchmark by the Coupled Code System ATHLET-QUABOX/CUBBOX / *Siegfried Langenbuch, Klaus-Dieter Schmidt, Kiril Velkov*
- 137** Sensitivity Studies for Main Steam Line Break Exercises 2 and 3 with RELAP5/PANBOX / *Rainer Böer, Alfred Knoll*
- 146** Analyses of the OECD Main Steam Line Break Benchmark with the DYN3D and ATHLET Codes / *Ulrich Grundmann, Sören Kliem*
- 154** CEA-IRSN Participation in the Main Steam Line Break Benchmark / *E. Royer, E. Raimond, D. Caruge*
- 166** Analysis of the OECD Main Steam Line Break Benchmark Problem Using the Refined Core Thermal-Hydraulic Nodalization Feature of the MARS/MASTER Code / *Han Gyu Joo, Jae-Jun Jeong, Byung-Oh Cho, Won Jae Lee, Sung Quun Zee*
- 180** Three Mile Island Unit 1 Main Steam Line Break Three-Dimensional Neutronics/Thermal-Hydraulics Analysis: Application of Different Coupled Codes / *Francesco D'Auria, José Luis Gago Moreno, Giorgio Maria Galassi, Davor Grgic, Antonino Spadoni*
