

TECHNICAL PAPERS

FUEL CYCLE AND MANAGEMENT

- 171** Neutronic and Logistic Proposal for Transmutation of Plutonium from Spent Nuclear Fuel as Mixed-Oxide Fuel in Existing Light Water Reactors / *Holly R. Trellue*

THERMAL HYDRAULICS

- 181** Computational Fluid Dynamics for the Analysis of Light Water Reactor Flows / *Constantine P. Tzanos*
- 191** Validation of Heat Transfer Models in Narrow Gap for RELAP/SCDAPSIM/MOD3.2 / *Tamio Kohriyama, Michio Murase, Takashi Nagae, Yukimitsu Okano, Alexandre Ezzidi*
- 202** Hydrogen Generation in Reflooding Experiments with LWR-Type Rod Bundles (QUENCH Program) / *Leo K. Sepold, Alexei Miassoedov, Gerhard Schanz, Ulrike Stegmaier, Martin Steinbrück, Juri Stuckert, Christoph Homann*
- 216** Identification of Loss-of-Coolant Accidents in LWRs by Inverse Models / *Wojciech Cholewa, Wiktor Frid, Marcin Bednarski*

NUCLEAR PLANT OPERATIONS AND CONTROL

- 227** Software Safety Analysis of Digital Protection System Requirements Using a Qualitative Formal Method / *Jang-Soo Lee, Kee-Choon Kwon, Sung-Deok Cha*
- 240** Design and Validation of Optimized Feedforward with Robust Feedback Control of a Nuclear Reactor / *Roman Shaffer, Weidong He, Robert M. Edwards*
- 258** Water Sorption and Gamma Radiolysis Studies for Uranium Oxides / *Alan S. Icenhour, L. M. Toth, Huimin Luo*
- 269** Nitrogen-16 Generation and Transport and Associated Shielding Requirements in a Supercritical-Water-Cooled Reactor / *Benjamin Fischer, Marci Smolinski, Jacopo Buongiorno*

REPROCESSING

- 284** Development of a Cobalt Dicarbolide/Polyethylene Glycol Solvent Extraction Process for Separation of Cesium and Strontium to Support Advanced Aqueous Reprocessing / *Jack D. Law, R. Scott Herbst, Dean R. Peterman, Rich D. Tillotson, Terry A. Todd*

MATERIALS FOR NUCLEAR SYSTEMS

- 291** Eddy Current Measurements of Corrosion and Metal Loss in Zircaloy Cladding with Ferromagnetic Crud / *Suresh K. Yagnik, Duane P. Johnson, John A. Kervinen*

DEPARTMENT

- 301** Book Review
