

## SODIUM TECHNOLOGY SPECIAL

- 1 Foreword / *Ronald W. King*

### TECHNICAL PAPERS

- 3 Evolution of Sodium Technology R&D Actions Supporting French Liquid-Metal Fast Breeder Reactors / *G. Rodriguez, F. Baque, J. C. Astegiano*
- 16 Distinguished Achievements of a Quarter-Century Operation and a Promising Project Named MK-III in JOYO / *Yukimoto Maeda, Takafumi Aoyama, Toshihiro Odo, Satoru Nakai, Soju Suzuki*
- 37 Lifetime Extension of the Phénix Plant / *J. Guidez, P. Le Coz, L. Martin, P. Mariteau, R. Dupraz*
- 44 The Dounreay PFR Liquid-Metal Disposal Project / *D. V. Sherwood, A. Comline, J. Small, J. Blyth*
- 56 Upgrade of Cooling System Heat Removal Capacity of the Experimental Fast Reactor JOYO / *Kazunori Isozaki, Takashi Ashida, Kouzou Sumino, Satoru Nakai*
- 67 Review of In-Service Inspection and Repair Technique Developments for French Liquid Metal Fast Reactors / *F. Baque*
- 79 Cleaning Cesium Radionuclides from BN-350 Primary Sodium / *O. G. Romanenko, K. J. Allen, D. M. Wachs, H. P. Planchon, P. B. Wells, J. A. Michelbacher, P. Nazarenko, I. Dumchev, V. Maev, B. Zemtzev, L. Tikhomirov, V. Yakovlev, A. Synkov*
- 100 Recent Sodium Technology Development for the Decommissioning of the Rapsodie and Superphénix Reactors and the Management of Sodium Wastes / *G. Rodriguez, O. Gastaldi, F. Baque*
- 111 A Reliable Steam Generator That Will Allow the Elimination of the Secondary Sodium Circuit in an LMFBR / *D. V. Sherwood, Y. Chikazawa*
