

SPECIAL ISSUES ON ADVANCES IN NUCLEAR FUEL MANAGEMENT III (ANFM 2003)—PART 2

- 107 Introduction to the Special Issues on Advances in Nuclear Fuel Management III—
Part 2 / *Bojan Petrović*

INCREASED ENRICHMENT/HIGH BURNUP AND LIGHT WATER REACTOR FUEL CYCLE OPTIMIZATION

- 109 Optimum Discharge Burnup and Cycle Length for PWRs / *Jeffrey R. Secker,
Baard J. Johansen, David L. Stucker, Odelli Ozer, Kostadin Ivanov, Serkan Yilmaz,
E. H. Young*
- 120 Extended Power Uprates and 2-yr Cycles for BWRs—Where Do We Go from
Here? / *Craig Brown, Ken Hartley, Jim Hulsman*
- 126 Effect of Highly Enriched/Highly Burnt UO₂ Fuels on Fuel Cycle Costs,
Radiotoxicity, and Nuclear Design Parameters / *Robert Gregg, Andrew Worrall*
- 133 Use of Sensitivity and Uncertainty Analysis in the Design of Reactor Physics and
Criticality Benchmark Experiments for Advanced Nuclear Fuel / *B. T. Rearden,
W. J. Anderson, G. A. Harms*

USE OF ALTERNATE FUELS IN LIGHT WATER REACTORS

- 159 Plutonium Recycling in Light Water Reactors at Framatome ANP: Status and
Trends / *Dieter Porsch, Walter Stach, Pascal Charmensat, Michel Pasquet*
- 168 Use of Thorium in Light Water Reactors / *Michael Todosow, A. Galperin,
S. Herring, M. Kazimi, T. Downar, A. Morozov*

FUEL MANAGEMENT OF REACTORS OTHER THAN LIGHT WATER REACTORS

- 177 New Fuel Cycle and Fuel Management Options in Heavy Liquid Metal-Cooled
Reactors / *Ehud Greenspan, Pavel Hejzlar, Hiroshi Sekimoto, Georgy Toshinsky,
David Wade*
- 192 Feasibility of Burning First- and Second-Generation Plutonium in Pebble Bed
High-Temperature Reactors / *J. B. M. De Haas, J. C. Kuijper*
- 201 Accuracy of Monte Carlo Criticality Calculations During BR2 Operation /
Silva Kalcheva, Edgar Koonen, Bernard Ponsard
