

FIRST INTERNATIONAL PYROPROCESSING RESEARCH CONFERENCE

- 117 Introduction to the Pyroprocessing Special Issue / *Michael F. Simpson*

TECHNICAL PAPERS

- 118 Recovery of U-Pu Alloy from MOX Using a Pyroprocess Series /
*Shinichi Kitawaki, Tadahiro Shinozaki, Mineo Fukushima, Tsuyoshi Usami,
Noboru Yahagi, Masaki Kurata*
- 124 Engineering-Scale Liquid Cadmium Cathode Experiments / *D. Vaden, S. X. Li,
B. R. Westphal, K. B. Davies, T. A. Johnson, D. M. Pace*
- 129 Cyclic Voltammetry Behavior of Americium at a Liquid Cadmium Electrode in
LiCl-KCl Eutectic Melts / *Hirokazu Hayashi, Mitsuo Akabori, Kazuo Minato*
- 135 Application of Graphite as a Cathode Material for Electrorefining of Uranium /
J. H. Lee, Y. H. Kang, S. C. Hwang, J. B. Shim, E. H. Kim, S. W. Park
- 144 Experimental Observations on the Roles of the Cadmium Pool in the Mark-IV
Electrorefiner / *Shelly X. Li*
- 153 Effect of Process Variables During the Head-End Treatment of Spent Oxide Fuel /
*B. R. Westphal, K. J. Bateman, C. D. Morgan, J. F. Berg, P. J. Crane,
D. G. Cummings, J. J. Giglio, M. W. Huntley, R. P. Lind, D. A. Sell*
- 158 Fractional Release Behavior of Volatile and Semivolatile Fission Products During
a Voloxidation and OREOX Treatment of Spent PWR Fuel / *Kee Chan Song,
Geun Il Park, Jung Won Lee, Jang Jin Park, Myung Seung Yang*
- 169 Application of Electrochemical Reduction to Produce Metal Fuel Material from
Actinide Oxides / *Yoshiharu Sakamura, Takashi Omori, Tadashi Inoue*
- 179 Modeling the Pyrochemical Reduction of Spent UO_2 Fuel in a Pilot-Scale
Reactor / *Michael F. Simpson, Steven D. Herrmann*
- 184 An Electrochemical Reduction of Uranium Oxide in the Advanced Spent-Fuel
Conditioning Process / *Sang Mun Jeong, Jin-Mok Hur, Sun Seok Hong,
Dae Seung Kang, Myoung Soo Cho, Chung-Seok Seo, Ji-Sup Yoon,
Seong-Won Park*
- 192 Chemical Behavior of Fission Products in the Pyrochemical Process /
*Jin-Mok Hur, Tack-Jin Kim, In-Kyu Choi, Jae Bum Do, Sun-Seok Hong,
Chung-Seok Seo*
- 199 The Ceramic Waste Form Process at Idaho National Laboratory / *Stephen Priebe,
Ken Bateman*
- 208 A New Approach to Minimize Pyroprocessing Waste Salts Through a Series of
Fission Product Removal Process / *Eung-Ho Kim, Geun-Il Park, Yung-Zun Cho,
Hee-Chul Yang*

(Continued)

CONTENTS / MAY 2008—VOL. 162, NO. 2

(Continued)

- 219** Alternative Technology for the Treatment of Waste LiCl Salt by Using Gelation with a Si-P-Al Material System and a Subsequent Thermal Conditioning Method / *In-Tae Kim, Hwan-Seo Park, Seong-Won Park, Eung-Ho Kim*
- 229** Absorption Characteristics of Fission Product Elements on Zeolite / *Takeshi Tsukada, Keiju Takahashi*
- 244** Synthesis of Actinide Nitrides in Molten Cadmium / *Yasuo Arai, Takashi Iwai, Mitsuo Akabori, Kazuo Minato*
- 250** A Feasibility Study for the Development of Alternative Methods to Treat a Spent TRISO Fuel / *Jong-Hyeon Lee, Joon-Bo Shim, Eung-Ho Kim, Jae-Hyung Yoo, Seong-Won Park, Christine T. Snyder*

TECHNICAL NOTE

- 259** Current Status of Pyrochemical Reprocessing Research in India / *K. Nagarajan, T. Subramanian, B. Prabhakara Reddy, P. R. Vasudeva Rao, Baldev Raj*
