

SPECIAL ISSUE ON NUCLEAR HYDROGEN PRODUCTION, CONTROL, AND MANAGEMENT

- 1 Foreword: Special Issue on Nuclear Hydrogen Production, Control, and Management / *Carl Sink, Kevin O’Kula*

TECHNICAL PAPERS

- 3 Is Hydrogen the Future of Nuclear Energy? / *Charles W. Forsberg*
- 11 Nuclear Production of Hydrogen as an Appropriate Technology / *Paul Kruger*
- 18 Economics of Meeting Peak Electricity Demand Using Hydrogen and Oxygen from Base-Load Nuclear or Off-Peak Electricity / *Charles W. Forsberg*
- 27 An International Overview of Nuclear Hydrogen Production Programs / *Gail H. Marcus*
- 32 The High-Temperature Electrolysis Integrated Laboratory-Scale Experiment / *Carl M. Stoots, James E. O’Brien, Keith Condie, Lisa Moore-McAteer, Gregory Housley, Joseph J. Hartvigsen, J. Stephen Herring*
- 43 Analysis Model for Sulfur-Iodine and Hybrid Sulfur Thermochemical Cycles / *Nicholas R. Brown, Seungmin Oh, Shripad T. Revankar, Cheikhou Kane, Salvador Rodriguez, Randall Cole, Jr., Randall Gauntt*
- 56 Synthesis of Hydrocarbon Fuels Using Renewable and Nuclear Energy / *Ken Schultz, S. Locke Bogart, Richard P. Noceti, Anthony V. Cugini*
- 64 Nuclear Hydrogen and Captured Carbon Dioxide for Alternative Liquid Fuels / *B. D. Middleton, M. S. Kazimi, Min Wah Leung*
- 76 Transient Analysis of Sulfur-Iodine Cycle Experiments and Very High Temperature Reactor Simulations Using MELCOR-H2 / *Sal B. Rodriguez, Randall O. Gauntt, Randy Cole, Fred Gelbard, Katherine McFadden, Tom Drennen, Billy Martin, David Louie, Louis Archuleta, Mohamed El-Genk, Jean-Michel Tournier, Flor Espinoza, Shripad T. Revankar, Karen Vierow*
- 86 Regulatory Issues on the Safety Distance Between a VHTR and a H₂ Production Facility and an Overpressure Prediction Using Correlations and a CFD Analysis for the JAEA Explosion Test in an Open Space / *Hyung Seok Kang, Sang Baik Kim, Min-Hwan Kim, Won-Jae Lee, Hee Cheon No*
- 101 Development of GAMMA Code as an Integrated Code Analyzing a Coupled Very High Temperature Gas-Cooled Reactor and Hydrogen Production Plant / *Chang H. Oh, Hong S. Lim, Eung S. Kim*

TECHNICAL NOTE

NUCLEAR PLANT OPERATIONS AND CONTROL

- 113 Steam Generator Component Sizing Model in a Combined Cycle of Power Conversion Unit for Very High Temperature Gas-Cooled Reactor / *Chang H. Oh, J. Han, R. Barner, E. S. Kim, S. Sherman*
